

“Visit to Water Treatment Plant.”

Water treatment plant visit was organised by Mahavir College of Pharmacy as a transformative educational excursion to a water purification plant in Nashik for its D pharmacy students on 06th Nov. 2023.

The visit aimed to provide students with first hand insights into the processes and technology involved in ensuring safe and clean drinking water for community.

Upon arrival at water purification plant students were greeted by knowledgeable guides who led them to various sections of facilities. The tour provided a comprehensive overview of the water purification processes from intake of water to distribution of it.

The water purification plant visit organised by Mahavir College of Pharmacy provided D pharmacy students with rich and immersive learning experience bringing theoretical knowledge with practical application. Underscore the importance of water purification in ensuring access to safe and clean drinking water highlighting the critical role of pharmacist and health care professionals in promoting public health and the environmental sustainability through experimental learning and engagement with industry experts, students gained a deep understanding of water treatment processes .

The visit not only enhanced their academic knowledge but also inspired them to contribute meaningfully to addressing pressing global challenges related to the water quality and sanitation.
